

Yiyuan (Steve) Wufeng

(585) 370-3124 · yfeng219@gmail.com · linkedin.com/in/yiyuan-wufeng · stevewufeng.github.io

Computer Science Graduate & AI-Assisted Development & Data Analyst & U.S. Citizen

Languages: Chinese (Fluent) · English (Fluent) · Japanese (Intermediate)

EDUCATION

Rochester Institute of Technology

Rochester, NY

Bachelor of Science in Computer Science, Minor: Mathematics

May 2026

Cumulative GPA: 3.85/4.00

TECHNICAL SKILLS

Languages: Python, C#, C, TypeScript, Java, HTML/CSS, Flutter

Cloud & DevOps: GitHub, Linux, PostgreSQL, CI/CD, Docker, Cloudflare R2, Spring Boot, Agile

AI Dev & Tools: OpenCode, GitHub Copilot

Core Competencies: RESTful API Design, IoT

PROFESSIONAL EXPERIENCE

Freelance Software Engineer

Jan 2026 - Jul 2026

Buho

Remote

- Deployed e-commerce platform on Railway with TypeScript and PostgreSQL, supporting cloud-native architecture and microservices.
- Directed multi-agent AI development with OpenCode, guiding LLM agents to develop features.
- Wrote CI/CD workflow on GitHub to ensure Docker containers built successfully before deploying to Railway.
- Built data analysis dashboard for order summaries, revenue tracking, and inventory and demand overview.

Key Skills: TypeScript, PostgreSQL, Docker, Cloudflare R2, OpenCode, CI/CD

Embedded Software Engineer

Jul 2025 - Dec 2025

Waygate Technologies (Baker Hughes)

Skaneateles, NY

- Ran manual smoke tests and wrote automated test cases to ensure high-quality releases.
- Processed and analyzed image/video quality data for product quality control.
- Conducted code reviews and received feedback from team members in an agile development environment.
- Collaborated with cross-functional teams to identify, document, and resolve software issues.

Key Skills: C#, Automation Testing, GitHub Copilot, Agile, DevOps, Spring Boot

Jr. Software Engineer Intern

Jun 2024 - Sep 2024

Tive Technology

Remote

- Designed and built UI for a social media mobile app using Flutter for the deaf community.
- Worked with distributed systems using Google Cloud Platform and Firebase Database.
- Implemented role-based access using Firestore Security Rules to enforce data isolation.

Key Skills: Flutter, GitHub Copilot, Google Cloud Platform, Firebase Database

Research Assistant

Sep 2023 - May 2024

RIT CAIR Lab (Computational Accessibility & Inclusion Research)

Rochester, NY

- Built HTML/CSS web app for visualizing emotion in text.
- Researched real-time emotion detection in speech using Wav2Vec2 and Whisper models.
- Deployed Wav2Vec2 on Google Cloud Platform for real-time affective captioning.
- Collected eye-tracking data for accessibility analysis study.

Key Skills: Python, HTML, CSS, GitHub

Research Assistant

RIT Global Cybersecurity Institute

Sep 2022 - Jul 2023

Rochester, NY

- Performed statistical analysis and processing on MITRE threat alerts to identify security patterns
- Set up space cyber-physical simulations with NS-3 for satellite communication and motion modeling
- Analyzed real-time satellite motion and communication systems using MATLAB and C++

Key Skills: MATLAB, Python, C++, NS-3, Satellite Communications, Cybersecurity

Research Intern

Tufts University

May 2022 - Jul 2022

Medford, MA

- Optimized properties of novel polymers using gradient descent algorithms in MATLAB and C++
- Applied object-oriented class structure and documentation practices to the Morpho-Lang compiler project
- Solved compiler and modular design problems for Morpho-Lang, an open-source scientific computing language
- Assembled a research poster presented to material science experts

Key Skills: MATLAB, C++, Machine Learning, Compiler Design

PROJECTS

NeuralCube — Autonomous Robot

Collaborator, owner: Chanel Cheng

Sep 2025 - Present

Spokane, WA

- Helped with ESP32 firmware and wiring for motor control.
- Helped design and 3D-print a custom robot chassis.
- Helped set up Raspberry Pi server and configured secure remote connection.

Key Skills: C, Arduino, ESP32, 3D Printing, OnShape, GitHub

4G LTE Unlimited Distance Drone

Collaborator, owner: Chanel Cheng

Aug 2023 - Dec 2024

Rochester, NY

- Helped build a 4G LTE remote drone for long-distance control.
- Helped configure reverse SSH and port forwarding for secure access to the remote drone.

Key Skills: Python, Raspberry Pi, Sixfab 4G LTE, IoT, Reverse SSH Tunneling, GitHub

VOLUNTEER

Visiting AI Research Associate (Volunteer)

Institute for Informatics and Applied Technology (IIAT), Gonzaga University

Aug 2026 - Present

Spokane, WA

- Helping research node-based AI tools for building and adjusting AI pipelines.
- Testing ComfyUI for visual prototyping and LangGraph for step-by-step agent workflows.

Key Skills: Python, ComfyUI, LangGraph

LEADERSHIP & COMMUNITY

Computer Science House (CSH) — RIT

Active Member

Aug 2021 - Present

- Active member of RIT's computer science living-learning community
- Hosted 5 technical seminars and workshops on DevOps, Linux administration, and software development to mentor peers

RIT Artificial Intelligence Club

Member

Aug 2022 - Present

- Explored active AI/ML research areas including large language models, computer vision, and autonomous systems
- Collaborated on group projects within an AI enthusiast community

EARLY PROJECTS & INTERESTS

- 3D printing seminar and blog covering the full FDM pipeline, slicing to Gcode, and first-print guidance (2021)
- Persistence of Vision (POV) display with custom 3D-printed armature, iterated through multiple prototypes (2021)
- DIY ergonomic laptop stand designed and 3D-printed to improve daily comfort (2021)
