

Yiyuan (Steve) Wufeng

(585) 370-3124 · yfeng219@gmail.com · linkedin.com/in/yiyuan-wufeng · stevewufeng.github.io

Computer Science Graduate · AI & Embedded Systems · Robotics · U.S. Citizen

Languages: Chinese (Fluent) · English (Fluent) · Japanese (Intermediate)

EDUCATION

Rochester Institute of Technology

Rochester, NY

Bachelor of Science in Computer Science, Minor: Mathematics

May 2026

Cumulative GPA: 3.85/4.00

TECHNICAL SKILLS

Languages: Python, C++, C, TypeScript, Java, C#, Dart, HTML/CSS, SQL

AI & ML: vLLM, SGLang, LangGraph, ComfyUI, Multi-Agent Systems, Computer Vision, OpenCode

Embedded & Robotics: ROS2, Linux, ArduPilot, Raspberry Pi, PixHawk, DirectML

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, GitLab CI/CD, GCP

Frameworks: FastAPI, SpringBoot, React, Vue.js, Flutter, Prisma ORM

Core: RESTful API Design, Data Modeling, IoT, RBAC

PROFESSIONAL EXPERIENCE

Visiting AI Research Associate

Aug 2026 - Present

Institute for Informatics and Applied Technology (IIAT), Gonzaga University

Spokane, WA

- Evaluating LangGraph to replace hardcoded decision logic in multi-agent robotic systems with stateful, customizable pipeline orchestration
- Investigating ComfyUI for rapid robot showcase generation, enabling visual prototyping and marketing of AI-driven robotics concepts before full implementation
- Researching agent-driven simulation frameworks (e.g., Qwen-AgentWorld) for interactive simulation environments with cross-domain knowledge transfer

Key Skills: Python, LangGraph, ComfyUI, Multi-Agent Systems, ROS2 Integration

Embedded Software Engineer

Jul 2025 - Dec 2025

Waygate Technologies (Baker Hughes)

Skaneateles, NY

- Delivered computer vision models into production testing via DirectML and C++ inference pipelines, enabling real-time defect detection on industrial inspection systems
- Processed and modeled large-scale industrial inspection data, optimizing backend pipeline throughput for embedded inference workloads
- Guided AI coding assistants (Copilot, Claude Code) to accelerate C++ inference development, critically reviewing and iterating on generated code

Key Skills: C++, Python, Computer Vision, DirectML, Embedded Inference, AI-Assisted Development

Jr. Software Engineer Intern

Jun 2024 - Sep 2024

Tive Technology

Remote

- Built and optimized RESTful APIs with SpringBoot and designed Firestore data models with security rules for multi-user access
- Delivered 4 Flutter-based mobile features adopted by 1,000+ active users and validated platform reliability through load testing

Key Skills: Python, SpringBoot, Firestore, Flutter, RESTful APIs

Research Assistant

RIT CAIR Lab (Computational Accessibility & Inclusion Research)

Sep 2023 - May 2024

Rochester, NY

- Containerized real-time data pipelines with Docker and built a RESTful API for high-throughput live transcription streams
- Built interactive captioning interfaces with React and Vue.js for comparative accessibility research

Key Skills: Python, Docker, RESTful API Design, GCP, Linux, React

PROJECTS

NeuralCube — Autonomous Robot (Personal Research)

2024 - Present

Collaborator

Remote

- Architected a multi-agent LLM orchestration layer on ROS2, routing navigation, memory, and search tasks to specialized subagents via ROS2 topics and services
- Deployed vLLM and SGLang inference servers on Linux for low-latency LLM responses in real-time autonomous decision-making
- Managed robot digital twin state using ROS2 parameters and state publishers, ensuring consistency across perception, reasoning, and action loops
- Identified pipeline rigidity as a core limitation, motivating current research into LangGraph for stateful, reconfigurable agent orchestration

Key Skills: Python, ROS2, Linux, vLLM, SGLang, Multi-Agent Systems, LLM Inference

4G LTE Unlimited Distance Drone

Aug 2023 - Dec 2024

Personal Project

Rochester, NY

- Built a programmable 4G LTE drone with Raspberry Pi, enabling beyond-visual-line-of-sight operation through internet-based communication
- Implemented server-side real-time image segmentation and autonomous navigation, enabling self-directed flight based on visual input
- Integrated PixHawk flight controller with ArduPilot firmware and Sixfab 4G LTE cellular hat for reliable remote piloting

Key Skills: Python, Raspberry Pi, Computer Vision, IoT
